

DESIGNER

“What matters most to me is the message a product conveys.”

BERND STEINHUBER

“Behind every successful design there is an objective, streamlined development process,” says Bernd Steinhuber about his pragmatic approach. And the success of the WIRO collection proves his point. Therefore, the wire luminaire is now also available as a wall, floor or table version and features a new suspension system that lifts all limits otherwise set by pre-defined light outlets. But its minimalistic design and the large variety of combinations in terms of colour, shape and size are not WIRO’s only wow factors: With the help of a dimmer, you can also adjust the lighting mood to any setting you can think of. We’d say: An unbeatable all-rounder.
