

# Pharaoh

DESIGNED BY HULGER

LIGHT  
YEARS

Pharaoh is a unique pendant light created for the eye-catching Plumen 001 light source. Pharaoh's aim has been to gently frame and enhance the expression of the Plumen light source, preventing glare, and ensure warm, dazzle-free direct light. In addition to a precise, harmonious shape, Pharaoh is impressive in its unusual and spectacular form. When the lamp is switched off, the shade appears to be mirror-like and reflective. And yet, the moment the lamp is switched on, the shade takes on a metallic transparency, thereby making the light source visible. The pendant light is made of injection-moulded ABS plastic and aluminium. This remarkable pendant comes with a Plumen 001 light source included.
